How to deploy a django application in a docker container

Create a file called Dockerfile and past the code bellow inside

```
FROM ubuntu

WORKDIR /app
COPY . /app

RUN apt-get update && \
    apt-get install -y python3 python3-pip && \
    pip install -r requirements.txt && \

ENTRYPOINT ["python3"]
CMD ["manage.py", "runserver", "0.0.0.0:8000"]
```
